

## Colorado Workers' Comp E-Billing Made Simple

Powered by Carisk Intelligent Clearinghouse (CiC)

Beginning January 1, 2026, the State of Colorado will require mandatory electronic billing (e-billing) for all workers' compensation claims. With CiC, providers and payers can stay ahead of the mandate—ensuring compliance, and reducing administrative burden

### WHAT THIS MEANS FOR PROVIDERS

E-billing through CiC unlocks real advantages:

- Faster reimbursement with electronic processing
- Accurate, timely payments from payers

### WHO MUST COMPLY?

- Payers: Per CCR section 1101-3, Rule 16-8-1, all payers (except self-insured employers) must accept e-bills.
- Providers Including SelectNet Participants: Any provider submitting 25+ workers' comp bills per month must bill electronically starting January 1, 2026.

### HOW IT WORKS:

When providers submit through CiC:

- Payers send an acknowledgment of receipt within 2 business days
- Payers send Electronic Remittance Advice (ERA) within 30 days
- Duplicate paper bills are prohibited

### TECHNOLOGY & COMPLIANCE MADE EASY

Colorado requires HIPAA-compliant ANSI X12 EDI formats (837, 275, 277, 835). Carisk Intelligent Clearinghouse is already fully compliant and ready to handle every format—ensuring a seamless transition for your practice.

### WHY CHOOSE CIC?

- Stay ahead of compliance before the 2026 mandate
- Automate ERA posting to eliminate manual processing
- Get paid faster and cut down Accounts Receivable delays
- Gain peace of mind with expert support guiding you through the transition

**Make the switch today.**

**Carisk Intelligent Clearinghouse is your partner in simplifying workers' comp billing.**
